DETAILED ACTION

Status of Claims

1. Claims 1-18 are pending.
2. Claims 1, 2 and 4-13 are rejected.
3. Claims 3 and 14-18 are free of the prior art of record.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

5. Claims 1,2 and 4-13 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Shrivastava et al. of U.S. Patent No. 6,221,901 B1 possessing a 102(e) date of April 22, 1999. Shrivastava et al. teach of the therapeutic administration of(-) hydroxycitrate to treat a variety of ailments including hypertension, (see column 2, lines 34-48).

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1614

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1 and 4-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Littera et al. of EP 803,202 A2, possessing a publication date of October 29, 1997. Littera et al. teach of the administration of hydroxycitrate, which assists in the decrease in the number of cholesterol and triglycerides. Accordingly, the compounds of Littera et al. are effective in treating various types of disorders, namely hypertension, (see page 2, lines 7-12 and lines 50-52).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 1614

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

11. Claims 1, 2 and 4-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shrivastava et al. of U.S. Patent No. 6,221,901 B1. Shrivastava et al. teach of the therapeutic administration of(-) hydroxycitrate to treat a variety of ailments including hypertension, (see column 2, lines 34-48). Although the prior art reference of Shrivastava et al. teaches of using the magnesium salt of hydroxycitrate it is well within the level of skill of the artisan to substitute one pharmaceutically acceptable cation for another. The determination of a dosage having the optimum therapeutic index, which includes pharmaceutically acceptable salts, is well within the level of one having ordinary skill in the art, and the artisan would be motivated to determine optimum amounts to get the maximum effect of the drug. Accordingly, the reference makes obvious the instant invention.

Allowable Subject Matter

12. Claims 3 and 14-18 are free of the prior art of record.
